(a) Observed against mechanical
$R^2 = 0.84$ (45 cells)
Observed width change (%)
Mechanical width change: constant-threshold oracle (%)
Hurdle variants
Quantile variants
Equality
(b) What adaptation adds beyond re-levelling
Residual: observed minus mechanical (%)
Static over-coverage (pp above nominal)
mean residual +6.9% [+5.3, +8.6]
r(residual, over−coverage) = −0.07
